Voiceless

Voiceless consonants do not use the voice. They are percussive and use hard sounds. Once again, you can test if a consonant is voiceless by putting your finger on your throat. You will feel no vibration in your throat, just a short explosion of air as you pronounce. Pronounce each of these consonant sounds and feel NO vibration in your throat.

p Makes hardly any sound without 'e' or other vowel

t

k

s

sh

ch

th (as in thing) Again hardly any sound without vowel)

f

h

Possible notation for open high hat - 'ts'

Closed high hat - 't'

Bass drum - 'um' closed mouth

MM for humming sound
